Detail-oriented professional with 14+ years of experience and proven knowledge of classroom management, and curriculum development in the classroom. Skilled in project management, design concept development, and UX/UI design. Adept at solving design challenges with a strong eye for detail. Seeking to utilize my skills as a frontend web designer to bring innovative and user-centered design solutions to life.

EXPERIENCE

Law Firm Website *Live Link*

Markowski Ruvalcbva Law Firm, LLC   May. 2025

Redesigned a modern, bilingual website for a law firm using HTML, CSS, and JavaScript.

- Implemented a language toggle feature with data-key attributes and a custom translation script to support Spanish-speaking users.
- Optimized layout and accessibility for a seamless experience across devices with responsive design and Flexbox.

Agency Landing Page *Live Link*

TRD Advertising   Feb. 2023

Created an attractive, mobile-responsive landing page that met client requirements for an advertising agency using HTML, CSS, and FormSubmit.

- Incorporated keyframe animations to enhance the user experience
- Used media queries to make the site mobile responsive

Capstone Project *Live Link*

Clever Programmer Bootcamp   Apr. 2022

Collaborated with two other developers to create a mobile-responsive, full-stack real estate web application using; React.js, MetaMask, Moralis and the Zillow API.

- Utilized Moralis as the backend to store user credentials
- Incorporated MetaMask as user authentication
- Implemented the Zillow API to retrieve property listings

Computer Applications Teacher

Da Vinci School for Science & the Arts, El Paso, TX
Aug. 2008 — Present

Taught various computer technology courses such as computer science, web design, and digital media to students in grades 6 through 12.

- Collaborated with colleagues on creating cross-curricular lesson content
- Responsible for the growth of the robotics program; where many students went on to obtain Engineering Degrees.
